Higher Education Improvement Project (HEIP)
Credit No. 6221-KH

**Terms of Reference for “Research assistance for
For Sub-project: Develop Environmentally Friendly Packaging Materials from Crop Residual
Fibers, SGA 07”**

I. Background

The Higher Education Improvement Project (HEIP) was approved by the Board of Directors of the World Bank on April 26, 2018 and became effective on 17 September 2018. The HEIP activities are funded by an International Development Association (IDA) Credit of US\$ 90.0 million equivalent and US\$2.5 million from the Royal Government of Cambodia. The project is expected to be implemented over a 6-year period – starting in July 2018 and ending in June 2024.

The project main beneficiaries include: support activities in five targeted public Higher Education Institutions (HEIs), relevant departments in the Ministry of Education, Youth and Sport (MoEYS), and selected private HEIs. The public HEIs include three within Phnom Penh – the Institute of Technology Cambodia (ITC), the Royal University of Agriculture (RUA), the Royal University of Phnom Penh (RUPP), and other two in the provinces – the Svay Rieng University (SRU) and the University of Battambang (UBB). The Phnom Penh-based public HEIs were selected because they represent the top institutes in the areas of Science, Technology, Engineering and Mathematics (STEM) and Agriculture education and research in the country. The two provincial HEIs, one in the northwest bordering on Thailand and the other in the south-east bordering on Vietnam, were selected because of their geographical proximity to Special Economic Zones and economic corridors that have a high volume of cross-border trade, thus increasing HEI-industrial linkages and graduate’s labor market participation. In addition, since private HEIs enroll one-third of students in STEM and Agriculture, this project will support selected private HEIs that mainly provide courses in STEM, Agriculture, and other priority subjects in line with the Industrial Development Policy (IDP) 2015-2025. These private HEIs will be competitively selected through a call for proposals.

The direct beneficiaries of HEIP include approximately 16,356 students (5,070 females: 31.0 percent) in the relevant departments at targeted HEIs who will enhance learning from: (a) improved teaching; (b) additional research opportunities; (c) more learning materials; and (d) upgraded facilities. Other beneficiaries include academic staff at targeted HEIs who will benefit from the higher education partnership programs and research funds. In addition, MoEYS staff members from selected departments and HEIs will benefit from sectoral governance activities supported by the project. Female students will in particular benefit from the building of dormitories, increasing access and retention in the program.

This project also aims to strengthen the system of higher education through the improvement of quality assurance mechanisms; expansion of information systems; and support the development of legislation for autonomous HEIs. These activities will be implemented by Directorate General of Higher Education (DGHE) and the Accreditation Committee of Cambodia (ACC).

II. Project Development Objectives

The Project Development Objective (PDO) of HEIP is to improve the quality and relevance of higher education and research mainly in STEM and Agriculture at targeted HEIs and to improve governance in the sector.

III. PDO-Level Results Indicators

The PDO Indicators are:

- a) Number of HE partnership programs evaluated as modest or higher by expert panels (to measure quality)
- b) Number of research projects in collaboration with industry completed (to measure relevance)
- c) Number of HEIs that completed accreditation process (to measure governance and quality).

This position supports PDO indicator “Number of research projects in collaboration with industry completed (to measure relevance)”

IV. Project Components

There are four main components as follows:

1. Component 1: Improving Teaching and Learning Capacity
2. Component 2: Improving Research in STEM and Agriculture
3. Component 3: Strengthening Sectorial Governance and Project Management
4. Component 4: Contingent Emergency Response

This position supports component “Improving Research in STEM and Agriculture”

V. Objective of the Assignment

The selected staff expected to provide assistant to support Research PI conducting research on **Develop Environmentally Friendly Packaging Materials from Crop Residual Fibers**. which will be based at the Faculty of Agriculture Engineering, Royal University of Agriculture. It is expected that the assistant will at all times observe the highest standard of professional ethics and integrity, and promote a results-oriented approach in the area of his/her responsibility and accountability.

VI. Scope of Work

The successful candidate will work under supervision of Dr. Theng Dyna, PI **Research SGA 07: Develop Environmentally Friendly Packaging Materials from Crop Residual Fibers**. Tasks will include, but not be limited to:

1. Support in data collection for experiment in laboratory and feasibility study of the newly developed product;
2. Data entry and self-capacity improvement on publication article and report writing;
3. Support in logistics arrangement when necessary;
4. Support in budget request and clearance;
5. Attend trainings/workshops organized by the project team;
6. Assist other relevant project work as required and assigned by the PI and Co-PI.

VII. Location

The selected candidate is expected to be based at Faculty of Agriculture Engineering, RUA. She/he is required to participate occasionally in meetings, training programs, and others, organized at provinces.

VIII. Qualifications and Experience:

1. BSc or senior student in Agriculture Engineering, Master candidate is preferable;
2. One year experience in similar position is preferable;
3. Can use Microsoft Offices, Internet and Email;
4. Good English proficiency;
5. Honest, able to work with less supervision, and good communication and teamwork skills;
6. Punctual and organized;
7. Willing to learn new things.

IX. Term

The position will start as early as possible, with 3-month probation, 1 year contract, and possible to renewed.

Interested applicant should submit:

1. Cover letter
2. Up-to-date CV with two referees
3. Copy of any obtained degrees, and other related certificates

By sending email to E-mail: heippr@rua.edu.kh cc nsopheap@rua.edu.kh not later than **19th July 2021**
